UNITED STATES DEPARTMENT OF AGRICULTURE AGRICULTURAL MARKETING SERVICE CROP REPORTING BOARD

APPLES

PRODUCTION BY VARIETIES

1953

WITH COMPARISONS

The 1953 commercial apple crop is estimated at 92,584,000 bushels—slightly more than the 1952 crop but 15 percent less than average. There was practically no economic abandonment this season or last season. In the Lastern States, the crop was the same size as in 1952 but 16 percent less than average. Drought in the Appalachian area materially reduced size of apples. The Central States harvested a crop 20 percent above last year but 7 percent below average. The Western crop is 7 percent below last year and 18 percent below average.

The 10 leading varieties in 1953, with the 1952 production in parentheses, are estimated in thousands of bushels, as follows: Delicious 21,081 (20,877), McIntosh 12,105 (7,190), Winesap 10,090 (10,353), Rome Beauty 6,428 (6,229), Jonathan 6,291 (5,509), Stayman 4,223 (3,704), Yellow Newtown 3,384 (4,501), Golden Delicious 3,160 (3,344), Rhode Island Greening 2,690 (1,255), York Imperial 2,682 (5,237).
